Take another look at...

Amelia Academy—a school that offers quality education in a family atmosphere. Take another look at a school where learning takes place in a family atmosphere. It is a place where students look forward to learning with their friends.

Take another look at Amelia Academy—a school where teachers are working to create interesting and challenging lessons. From a Christian context, students are taught values and responsibility for personal choices. Small numbers mean that everyone has to work together. Students are encouraged to get involved, and they are very much aware of how much they make a difference.

Take another look at Amelia Academy—a school whose recent graduates are excelling at universities such as the University of Virginia, Virginia Tech, University of Mary Washington, Virginia Commonwealth University, and Longwood University, to name a few.

I love my school because we do a lot of fun things.

The Annual Fund Makes a Difference

Many alumni and parents of alumni have generously donated to the Annual Fund this year. **The campaign continues until June 30, 2015.** These funds are already being put to work in closing the gap between what tuition dollars provide and the real cost of educating a student at the Academy.

Annual Fund, continued from page 1

Over the past decades Annual Funds have become essential for private schools to maintain fiscal health and stability. Amelia Academy has a strong tradition of maintaining tuition rates at a level that is affordable for the greatest number of families in the region. The Annual Fund will allow for this ongoing commitment to stabilizing tuition rates.

A gift of any amount will make a difference. "We are encouraging all alumni and parents to consider supporting the Annual Fund at whatever level they can afford. Some may not realize that a gift of any amount can make a difference, but it can, especially when everyone comes together with their support," said Kelly Anderson, president of the Board of Directors. "We need everyone's help so that we can maintain an affordable, excellent school environment."

I have enjoyed the personal relationships that students can form with their teachers and the close-knit environment.

I like to be near all of my friends while I am learning. We have so many opportunities here. We can talk openly and make our own decisions. Because we have fewer students, all the

teachers know their students personally and can help them learn.
